To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. The war had left his parents afflicted by genetic damage, and their first two children had not survived infancy. Paradoxically, their health had qualified them favorably in their application to join the Mission since the planning had called for the inclusion of older people and higher-risk actuarial categories among the population to make room for the births that would be occurring later. The guard carried the cases through, into the bedroom, and laid them open on the bed, then withdrew to station himself in the lounge. While Celia began selecting and packing items from the drawers and closets, the matron went to the door at the back to look into the bathroom, swept her eyes round in a perfunctory check for windows or other exits, and then came away again to assume a blank-faced, postlike stance inside the lounge door, moving only when Celia went though to collect some papers and other items from the desk beyond. Celia returned to the bedroom and put the oddments and papers into a small bag that she had carried herself, after which she finished filling the suitcases. Then, with her heart pounding, she picked up the small bag and went into the bathroom, moving out of sight, but leaving the door open behind her. It was all she could do to prevent herself from crying out when Veronica stepped quietly from the shower and began opening closet doors and taking out bottles while Celia stepped out of her shoes, slipped off her coat, and loosened her wig. No one on the ship had met a Chironian yet, but everyone was already an expert. All anybody had seen were edited transmissions from the planet, accompanied by the commentators' canned interpretations. Why couldn't people realize when they were being told what to think? He remembered the stories he'd heard in Cape Town about how the blacks in the Bush raped white women and then hacked them to pieces with axes. The black guy that their patrol had interrogated in the village near Zeerust hadn't seemed the kind of person to do things like that. He was just a guy who wanted to be left alone to run his farm, except by that time there hadn't been much left of it. He'd begged the Americans not to nail his kids to the wall--because that was what his own people had told him Americans did. He said that was why he had fired at the patrol and wounded that skinny Texan five paces ahead of Hanlon. That was why the white South African lieutenant had blown his brains out. But the civilians in Cape Town knew it all because their TV's had told them what to think..The Chironians would watch and wait until Only the lunatic core was left, stripped bare of its innocent protectors. There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. Stern watched, listened, and said nothing. In its natural condition a society was like an iceberg, eight* ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a right and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn. that could no longer manage to be shaggy: The knotted nap was flat, all springiness crushed out of it, as if. Following a directive from Wellesley, Howard Kalens instructed Amery Farnhill to open an embassy in a small building at Canaveral which the Chironians obligingly agreed to vacate, having been about to move into larger premises elsewhere anyway. The intention was to provide a focal point that the Chironians would recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL "A calculated degree of intimidation is acceptable, but on no account are they to use force. "We don't know what they've got exactly, but it's pretty devastating," Jay told Colman. "We figure they've already tested it. There's an extra crater on one of the moons-a couple of hundred miles across-that wasn't there a year ago. Imagine if whatever did that was to hit the ship." The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge and expertise in every form, and they showed it. Perhaps, he thought to himself, that was how the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. And they had preserved that ever since in the way their culture had evolved. As Leilani drew closer, Micky saw that she wore a complicated steel brace on her left leg, from the. Stern's face darkened, and his mouth twisted into an ugly grimace. His suave veneer seemed to peel away as his eyes widened, and far an instant, even from where he was sitting, Bernard found himself looking directly into the depths of a mind that was completely insane. He shivered involuntarily. Beside him Celia gripped his arm. "General," Stern ordered. "Launch the missile in sixty seconds." Curtis shudders. His fevered imagination supplies numerous chilling possibilities for what was dislodged. A coincidence, however, is frequently a glimpse of a pattern otherwise hidden. His heart tells him. Merrick's pained expression deepened into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything.
