Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division..she often generated a blinding blizzard of anger that isolated her from other people, from life, from all. Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for.. "I don't know," Bernard said dubiously. "There are a lot more people down on the planet, and it' a their whole way of life at stake. Maybe they wouldn't. Behind him Wellesley, white faced and haggard, slumped into his chair.."I've only got until my next birthday, and then all bets are off." The girl moved along the swooning fence.As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had-uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" 6f the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years.."I didn't realize anyone got embarrassed about anything anymore. JEAN FALLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth.. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. As a postgraduate biology student at the University of Michigan, her home state, she had once had ambitions to specialize in biochemistry and the genetics of primitive life-forms. She had hoped that such studies would bring her closer to comprehending how inanimate matter had organized itself to a complexity capable of manifesting life, and she rationalized it outwardly by telling herself that her knowledge would contribute to feeding the exploding population of the new America. And then she had met Bernard, whose youthful zeal and visions of the. "I better check those orders." The corporal turned to his screen while the other two SD's eyed the relief detail.
